

## C-Air Cut Media Pads and Rolls

Media pads or rolls come in many different grades and for many applications our filter medias within the HVAC industry are many and diverse. Our standard filters are thermally bonded from synthetic fibres they are also progressively structured thereby offering high dust holding capacity, non-woven filter materials are able to operate in many different environmental conditions such as high humidity and variations in temperature.

Our filters meet the new standards (e g EN779 : 2002 ) Our medias are also Flame Retardant to DIN.53438

We supply air filter materials in grades G2 through to F5 the medias can be used in card panels as pre filters or as pads in our pad frames. They can be used in the spraybooth industry as well as many other industrial applications.

We can cut the pads to any size you require, rolls come in 1x20m or 2x2m and come in a range of grades such as G2, G3,F4, and F5 in 10mm, 20mm , 25mm or 50 mm thicknesses. We also hold glass fibre media rolls in 1x20 and 2x20m in 100 or 50mm thicknesses. We can also supply reticulated foam and fly screen materials.

Above is a small sample of the filter medias we can supply you, for any further information do not hesitate to contact us for advice on what will best suit your application.

## We Now Offer Auto Roll Filters studed and un studed in many grades
